PROFILE

I'm a pre-final year computer engineering student seeking intern role. I'm a highly ambitious and skilled individual in frontend development, passionate about building complex web applications. I have the ability to deliver visually appealing and user-friendly by write efficient and clean code while staying updated with industry trends. Additionally, my collaborative mindset, ability to work seamlessly with the backend team, and close collaboration with designers will contribute to successful project outcomes.

PROJECTS

Rawg UI Clone

[Live Link](#)

- Implemented a responsive UI clone utilizing React, TypeScript, chakra UI, Axios.
- Featuring dynamic functionalities including Theme Switching, Game Search, Game Type Selection, Sorting Games by Platforms & Relevance, and Fetching Game Data from API's. Additionally, optimized image rendering for enhanced performance.

Jadoo Travel Landing Page

[Live Link](#)

- Crafted a modern, responsive landing page for a travel website using Tailwind CSS, precisely designing each component.
- Expanded expertise in Tailwind CSS through deep exploration and practical application in the project.

Bookmark Landing Page

[Live Link](#)

- Developed a responsive landing page for the Bookmarks Manager challenge on Frontend Mentor using Tailwind CSS.
- Ensured seamless responsiveness and elegant design throughout the project.
